

# SiOnyx

A U R O R A

LE Edition

World's first action camera with color night vision!

View and record your surveillance activities all day and night with the SiOnyx AURORA action camera. True color night vision enhances your situational awareness and allows you to capture all the action in near moonless starlight!

Use the AURORA app on your smartphone to remotely control your AURORA; start/stop record, playback, view files, and adjust settings.

You can even remote live view over WiFi. Leave AURORA behind and run surveillance from a distance.
